## **Rules**

We are playing according to the official R&A rules. You can find them here:

[www.randa.org/en/rog/2019/pages/the-rules-of-golf](http://www.randa.org/en/rog/2019/pages/the-rules-of-golf)

## **Winter Rules**

Under winter rules, a ball coming to rest on close mown areas may be marked, lifted, cleaned and placed within six inches (150mm) of where it originally lay, no nearer the hole.

## **Local Rules**

Please familiarise yourself with our local rules here: [www.mirafloresgolf.es/local-rules](http://www.mirafloresgolf.es/local-rules)

## **Electric Fencing**

There is low level electric fencing on many of the holes, in order to keep feral boar from damaging the course. Where this fencing is on the inside of the course boundaries, free relief of up to one club length, no nearer the hole is allowed.

## **Etiquette**

All players are asked to observe golf etiquette and to obey the rules of golf so that everyone on the course may enjoy their game. Here are some important things to remember:

- No one should move, talk or stand close to or directly behind the ball or the hole when a player is addressing the ball or making a stroke.
- No player should play until the players in front are out of range.
- In the interest of all, players should play without delay.
- Play 'ready golf'; make your club selection whilst your playing partners are hitting. If you can take your practice swings without disturbing your partners whilst they are hitting – do so. If you can line up your putt whilst playing partners are playing – do so. Don't wait until it is your turn before you start thinking about your shot!
- Slow Play: Slow moving players should call faster moving players through. The lowest handicapped player is captain of any formation and is responsible for maintaining etiquette, procedure and speed of other players.
- Calling through: If you have lost a ball, or are for any other reason are unable to maintain your place in the field, call the players behind you through. This is their right and should always be voluntarily and cheerfully given. A group playing a whole round is entitled to pass a group playing a shorter round. The term 'group' includes a single player.
- When the play of a hole has been completed, players should immediately leave the putting green.
- Cards should be marked at the next tee.
- All players are requested to carry a sand bag and to fill in divots.

## **Slow Play**

Slow play irritates everyone on the golf course. Players should be aware at all times of their position on the golf course. It is their responsibility to maintain their position on the course and avoid undue delays. Any group that has lost a complete hole on the group ahead of them should call a faster group through. Marshalls will ask you politely to speed up and if you lose two holes they may ask you to skip one hole. Members searching for a ball, unless found almost immediately, should allow the following groups to play up. They should not wait until the ball has been declared lost (3 minutes) to signal to the group behind. Play should not continue until it is safe to do so.

## **Divots**

Please replace divots where possible. Alternatively fill the divot hole with sand and seed mix. Buggies are equipped with sand bottles, small bags of sand for players who are walking which can be attached to trolleys are available on the first tee. From time to time we have divot parties made up from the members who spend a couple of hours walking the course filling in divots left unrepaired.

## **Mobile Phones**

Mobile phones, if carried on the course, should be switched to silent and only used for an emergency. Please remember, that small safety boxes are available in caddy masters office.

## **Safety, Accidents and Emergency**

Safety on the course is paramount. Members are responsible for ensuring that the area of the course they are about to play to is clear of other course users (both members/guests/visitors and green keeping staff).

Contact the caddy master in the event of an accident or persons taken ill on the course. First aid kits and a defibrillator with appointed persons are available. Defibrillators are located in the main hallway of the club, adjacent to the member notice boards.

Please report any injury to players or animals to the caddy master on 952 93 19 60.

### **Medical emergency**

A medical emergency on the golf course should be handled the same way as it is off the golf course - calmly and quickly. If a fellow golfer is in distress please follow these rules:

- Please check the breathing, the consciousness and the pulse of the patient.
- Please immediately call the caddy master at +34 952 931 960. He will call Helicopteros Sanitarios, a 24-hours-a-day, 365-days-a-year health care service with a fleet of mobile intensive care units. The club has a contract with Helicopteros Sanitarios, and there will be no charge for the patient.
- In case you can't get in touch with the caddy master, please call Helicopteros Sanitarios at 952 811 818 In every flight one person should carry a mobile phone! When Helicopteros Sanitarios arrives it will help the doctor if he has medical information about:
  - Important existing diagnosis / diseases.
  - Actual medication.
  - Existing allergies (if you have none, write none).
  - Your medical Information should be "short" in Spanish and/or English and kept where it can be found easily (e.g. wallet, phone in Medical ID, health app etc) The caddy master will, if necessary, contact one of the trained first aid persons or, if by coincidence, a doctor or nurse being available.
- At the moment the 4 trained persons are Francisco, Jose, Sally and Miguel. We have the following equipment available in the club, which can be used in an emergency:
  - Emergency kits:
    - Normal kit with bandage etc.
    - Doctors kit with diagnostic and therapeutic equipment.
    - Defibrillator.

**How to diagnose a heart attack or cardiac arrhythmia?** If the patient has no pulse or is not breathing, you must start cardiopulmonary resuscitation (compression of the sternum 4-5 cm). Please use a mask.

The use of the defibrillator should only be done by trained persons. NO PHYSICAL CONTACT WITH THE PATIENT DURING DEFIBRILLATION. Only medication if in pain: nitro-glycerine under the tongue.

**How to act in case of a stroke?** If the patient is conscious, please wait till the Helicopteros Sanitarios doctor arrive.

**If the patient is unconscious and breathing**, please bring him/her into a recovery position (side lie, mouth 45 degrees downwards). In this case, please no drinks, food or medication!

**How to act in case of a bone injury** Bring the patient in a comfortable position, but move her / him as little as possible. Do not administer painkilling medication.

- Always be aware: The reason for "slipping away" can be e.g. a stroke, bite of a scorpion or a snake:
- Not deadly, but painful! They hide underneath stones. Always use your foot to move a stone - not your hand!

- **Bite of a tick:** They can transmit Borreliosis and/or tick-born encephalitis if the tick starts to vomit during the manipulation to eliminate them.
- Therefore leave the tick and use a special tweezers (emergency kit in the clubhouse) by compressing the ticks neck and start to pull slowly (30 – 60 seconds) till the tick releases hold.
